

New Essence

GDP-06i

We have created new Essence, the phone with new functions and upgraded hardware. It keeps proven design, intuitive control and cloud administration, all appreciated characteristics of the previous model.

What's new?

Extended memory of 2.500 contacts fits the needs of big companies.

New GSM module brings faster data transmission.

Fully digital audio processing ensures better sound.

Multicolour LEDs inform you about device status.

Upgraded powerful processor provides higher performance of the phone.

Transfer button makes call transferring process more comfortable.

We are confident in the quality of new Essence and you can rely on it. Extended 36 months warranty for all of our phones proves it.
